Crystal clear—thanks to Texas Eastern

Glassware tempered in Owens-Illinois' natural gas-fired furnaces is tested with mechanical mallets for strength and durability. Gas is supplied the Ohio manufacturer by The Ohio Fuel Gas Company, a customer of Texas Eastern.

Texas Eastern transports natural gas via pipeline from the Southwest for use at the Owens-Illinois' Libbey plant at Toledo to help produce beautiful and practical glassware. Not so long ago fine table glassware was rare and expensive. Today, it is abundant and reasonable in price, because modern equipment and fuels have made mass production methods possible. Natural gas-fired furnaces, in which critical temperatures are maintained; are used to "baby" the molded glass along during the cooling stage and give it its final temper. As a result, the glassware you buy is beautiful, strong and economical.

TEXAS EASTERN

Texas Eastern pipelines carry natural gas from the Southwest through a 5100 mile system to serve homes and industries of the Midwestern, Appalachian and Eastern areas.
